

Chemical Development Solutions

GVK BIO offers a spectrum of Chemical Development Solutions delivering a seamless and innovative transition of services from lab to pilot plant and bulk manufacturing. Our core competency is to resolve complex scientific problems with a systematic approach in a time bound manner.

We build the required quality into the process during the design and development phase by understanding the Critical Process Parameters (CPPs) and Critical Material Attributes (CMAs).

Our Chemical Development team consists of experienced process and analytical scientists, chemical engineers, safety professionals and manufacturing experts with an unparalleled track record. The Chemical Development team is ably supported by an expert team of supply chain, warehouse, quality control and quality assurance personnel. The team is proficient in developing robust chemical processes and scale up the product of interest rapidly.

We cater to various sectors such as Pharmaceutical, Specialty chemicals, Agrochemicals, Polymers, Oligonucleotides, Animal health and Consumer products.

Our facilities have been inspected and accredited by global regulatory authorities and major pharma clients.

Ministry of Food and Drug Safety

Our Solutions Include:

- Route scouting
- Process R&D
- Bio & chemo catalysis
- Carbohydrate chemistry
- Eco-friendly synthetic route
- Analytical method development and validation
- Complete impurity profiling
- Stability studies
- CMC support

Leading Small Molecule CRDO

Large Molecule Discovery Partner
